**Subject:** RE: Willamette River Clean-Up, Portland Oregon

The draft clean-up plan leaves far too much of the river contaminated . Portland Audobon, after careful study, recommends 1,000 acres of polluted sentiment be removed and I agree.

The draft plan relies far too much on monitored natural recovery – a strategy that leaves pollution in the river hoping it will be covered over or flushed downstream. This is not acceptable.

The cleanup plan must result in the removal of the fish consumption advisory so eating fish from the lower Willamette is safe, and this must occur in a 10-20 year time frame.

Creating a toxic waste disposal dump in our river is NOT acceptable. Dredged toxic sediments must be taken to an appropriate landfill.

Entities liable for the pollution must be held accountable and pay for a cleanup that will protect the health of our community and wildlife.

Sincerely,
